## BIO

In less than a year, San Francisco grunge band chokecherry have racked up twice as many Spotify streams as their city's population. They've exploded onto the scene with multiple festival dates, tours alongside Destroy Boys and Death Valley Girls, and signed to Fearless Records. They are, by all indications, a band on the verge of blowing up. With a sound that can only be described as heaviness layered with ethereal, feminine rage and a look uniquely named "runaway bride core," this queer, female fronted trio are poised to take the rock world by storm.
